

What size does my Dog need?

Our **NEW LIGHTWEIGHT WATERPROOF DOG TROUSERS** size chart below is a guide only. If in doubt, please send us a message with the three measurements below and your Dog's Breed so that we can advise the best size for your Dog.

Step 1: Measure your Dog's inside front leg length (inside armpit to ankle)

Step 2: Measure your Dog's back length (from base of neck to tail).

Step 3: Check your Dog's weight is within the Average Weight shown

If your Dog is at the top end of the measurements and/or weight, (or has a very thick/long coat), we suggest the next size up. Our Large size has 3 leg versions available 1, 2, & 3. You can also see our suggested Breed sizes. If you are looking for a size or Breed that does not match our Size Guide please send us a message. We are always open to expanding our Size Range if demand outside our 15 Sizes presents.

If you have a three-legged dog, of course we are happy to hear from you.

Suggested Size	Front Leg Length (Inner Armpit to Ankle)	Body Length (Neck to Base of Tail)	Average Weight	Breed Type	RRP
